EDUCATION

Rutgers University – New Brunswick

BS Computer Science & BS Economics

Sep 2022 – Jan 2026

GPA: 3.885/4.0

EXPERIENCE

TimeMesh – Productivity SaaS Platform

Software Engineer

Jul 2024 – Dec 2024

Remote

- Accelerated scheduling APIs 70% by reducing median response time from ~83ms to ~25ms through PostgreSQL index tuning and Django REST Framework query rewrites.
- Shortened CI runtime 20% and release cycle time 50% by moving Postman regression suites into GitHub Actions and validating API behavior before merge.

Rutgers University – SC&I IT Helpdesk

Web Developer & IT Support Technician

Jan 2025 – Jan 2026

New Brunswick, NJ

- Closed 20+ weekly ServiceNow tickets within SLA while maintaining 95% CSAT by owning incidents from intake through root-cause documentation and follow-up.
- Analyzed 1,000+ annual ServiceNow tickets to identify repeat incident patterns, improve triage visibility, and convert recurring fixes into reusable support documentation.

PROJECT EXPERIENCE

DockFlow

Software Development Engineer – Django REST Framework, React, PostgreSQL, CI/CD

2025 – Present

- Built a modular WMS backend across 22 Django apps for auth, IAM, inventory, inbound/outbound, returns, logistics, fees, work orders, reporting, and marketplace integrations.
- Preserved backward compatibility through 18 /api/v1 route groups and 11 legacy-compatible API route groups across warehouse, inventory, automation, and marketplace workflows.
- Instrumented automation reliability with scheduled tasks, background jobs, worker heartbeats, retry states, dead-letter states, and alert records for failed operational workflows.

ChemFarm

Backend Engineer – FastAPI, Supabase, PostgreSQL, ETL, RLS/RPC

2025 – Present

- Implemented 7 FastAPI routers for gameplay metadata, rendering, asset storage, ingestion, tooling, system health, and plant generation in a game-powered STEM learning platform.
- Converted manual CMS updates into a 7-parser ingestion pipeline with dry-run validation, code normalization, dependency-ordered execution, and Supabase write controls.

Video Automation Pipeline

Automation Engineer – Python, Makefile, Remotion, n8n

2026 – Present

- Orchestrated a 10-stage script-to-video workflow that packages prompts, scripts, audio, captions, storyboards, render assets, QA reports, upload metadata, and logs into repeatable production artifacts.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, TypeScript/JavaScript

Backend/Data: Django REST Framework, FastAPI, PostgreSQL, Supabase, REST APIs, OAuth2/JWT

Cloud/DevOps: AWS, Docker, GitHub Actions, Postman, CloudWatch, Vercel, CI/CD

Frontend: React, Vite, Next.js, MUI, Storybook, React Query, Pixi.js
